

# techTALK

AUTUMN EDITION 2021

ISSUE  
18

The Lomani Island Resort is looking spectacular!  
More inside on what Techlam supplied for the project.

## Autumn Techtalk

The weather is cooling down, but Techlam are full steam ahead. Have a look at what we've been up to.

In this issue of Techtalk:

- Techlam family day pictures
- Updates from our projects around Australasia
- Introductions
- Industry news

Warm regards,  
Brett and the Team.

## // A note from our MD

Hi All,

The NZ construction industry is performing very well, with all regions experiencing significant growth.

Supply chain remains a challenge; however, most industries are managing well given the circumstances.

Techlam has a substantial forward order book, both within NZ and also in our export markets. The shift in demand since the Covid period seems to be the new normal for the time being.

I am incredibly grateful for our awesome team, who work tirelessly to support our clients across all markets.

## // Current Projects

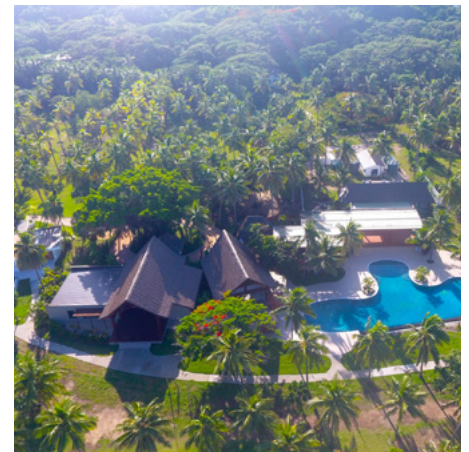

### Lomani Island Resort

The Lomani Island Resort is near completion

This project has come together very well. A great result from all who were involved, Raffe Hotels & Resorts, Architects Pacific, Kapadia Consultants, and many more worked tirelessly on this project to make it come alive.

Techlam supplied posts and portals to the main lobby and bar structures. These components were prefabricated and prestained ready to be put together on site with ease.

This is the second project Techlam have worked on with the Raffe Hotels & Resorts Group. Check out more on our website.

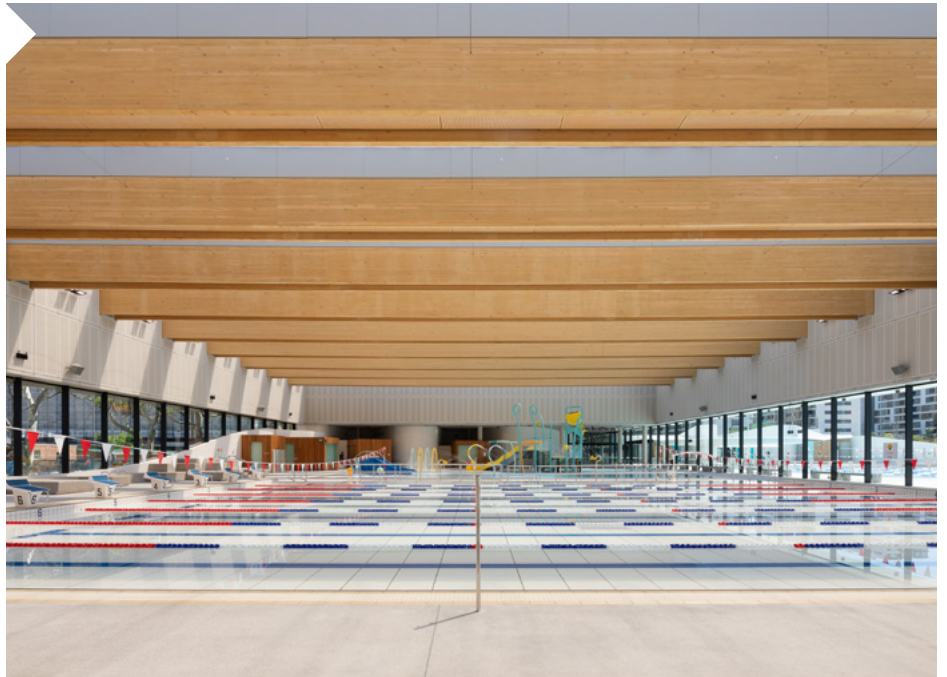

## Gunyama Park Aquatic & Recreation Centre

The Gunyama Park Aquatic Centre is open.

Featuring 36m glulam beams by Techlam. These beams are made up of 3 smaller beams joined together with hidden connections.

Fun Fact: Glulam performs very well in an aquatic environment, despite what you might think, it's actually very dry!

## Wanaka Pool

Another pool project all go.

The Wanaka Pool & Gym features prefabricated glulam columns and rafters. A great solution for an aquatic environment. This project is coming together well on site - we'll have more updates next time.

## Flock Hill Homestead

Great progress is being made on site.

The Flock Hill Homestead is another amazing concept from Warren & Mahoney Architects, featuring Techlam Glulam components. We can't wait to see this project once it's completed.

## Outdoor Pergola

Some awesome work by Sean O'Sullivan

It's always great having images sent in from our customers! if you have any Techlam Glulam images, just send em through.

## Rototuna Village

Featuring Techlam Glulam

The Rototuna Village shopping centre has some nice glulam components on show.

# // Techlam News

## Family Day

Techlam's family day tour

We opened up our manufacturing plant recently so that our staff could show their friends and family around. It was awesome to show them what we do to manufacture premium glulam products.

It was a fantastic day with a turn out of around 100 people plus our own staff to guide their whanau around.

## Jasmax Presentation

It was great to present at Jasmax Architects in Auckland last week!

Jasmax are focused on sustainable design. We had a lot of fun sharing our product with them. Being able to answer their questions was awesome, and we're both looking forward to seeing a lot more timber structures in the future.

## Archipro

We've joined Archipro.

Plan your next project using archipro, and utilise Techlam glulam in your mood boards. Archipro acts as a directory for all products available in New Zealand. Head to their website and take a look.

## Techlamiversaries

Congratulations are in order

Some of our staff have been at Techlam for over 25 years, The last few months have seen anniversaries ranging from 2 to 23 years!
